

INSIDE SALES/ CUSTOMER SERVICE

We are a wholesale distributor looking for a dynamic inside sales/customer service superstar to work with our small business customers!

Maximum success will be for those who nurture & grow our business relationships with existing customers and also help us find and grow new accounts.

This is not a retail/consumer sales business; we are B2B (wholesale).

A top candidate would have at least 2 years data entry, customer service or parts counter experience in a fast-paced and preferably home building/consumer product environment. Product training will be provided. Self-motivated and driven people will have the most success - but isn't that generally true?!

Monday - Friday approx. 8am - 5pm.

Base plus commission and other incentives. The pay range for this position is \$36k - \$40k for the first year, to grow after that once you get a sales territory and commissions. Although you are working mostly with established customers, it can take some time to grow the business and that is where the pay can really grow. You will learn the ropes first, then once when you've demonstrated a good grasp of what we do, we'll assign a sales territory.

Include salary history.
